

SUGANDHA VASHISHTHA

Cloud & Site Reliability Engineer

Ghaziabad, India | +91 7906204504 | Sugandh1212@gmail.com | linkedin.com/in/sugandha-vashishtha

PROFESSIONAL SUMMARY

Cloud and Site Reliability Engineer with 9+ years of experience in IT, including 4+ years specializing in cloud operations and Site Reliability Engineering (SRE) across Amazon Web Services (AWS), Microsoft Azure, and Microsoft Nebula on-premises environments. AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner. Hands-on experience with Dynatrace, Jarvis, Hawkeye, and Microsoft ICM for production monitoring, alert triage, and root cause analysis (RCA). Proven track record managing AWS EC2 administration (patching, snapshots, Session Manager, rollback strategy), Azure Bastion architecture for hybrid cloud workloads, and SAST/DAST-driven application security and vulnerability remediation. Skilled in SQL, KQL (Kusto Query Language), Linux and Windows administration, and incident management with SLA and SLO accountability. Foundational understanding of Snowflake architecture and Python fundamentals.

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, Hybrid Cloud, Microsoft Nebula, On-Premises Infrastructure

AWS Services: EC2, Lambda, IAM, Session Manager, Step Functions, AWS Cloud, AWS Infrastructure, Cloud Migration

Azure Services: Azure Bastion, Azure DevOps, Virtual Networks, Load Balancers, Resource Groups, Subscriptions, IAM, HTTP Proxy

Monitoring & Observability: Dynatrace, Jarvis, Hawkeye, Microsoft ICM, Application Performance Monitoring (APM), Metrics, Logs, Alert Triage, Root Cause Analysis (RCA), Operational Health Checks

Site Reliability Engineering (SRE): Incident Management, Problem Management, SLA Management, SLO Management, Designated Response Individual (DRI), Production Support, Service Availability, Spike Management

Application & Infrastructure Security: SAST (Static Application Security Testing), DAST (Dynamic Application Security Testing), Vulnerability Assessment, Vulnerability Management, Vulnerability Remediation, OS Patching, Change Management, Compliance

Data & Querying: SQL, KQL (Kusto Query Language), Snowflake (Architecture), Data Warehouse Concepts

Scripting & Automation: Shell Scripting, Python (Fundamentals), Docker, CI/CD Pipelines, Git, GitHub, GitHub Copilot

Operating Systems: Linux, Windows Server, Windows 10, Windows 8.1, Windows 8

Networking: TCP/IP, DHCP, WDS (Windows Deployment Services), Load Balancing, Proxy Configuration, Network Troubleshooting, Routing, Switching, Wireless

On-Premises Infrastructure: Microsoft Nebula, Nebula Lite, Cloudman, Fabric Manager, RAID Configuration, Bare Metal Operations, Hardware Management

Methodologies & Tools: Agile, ITIL Concepts, Snapshot Management, Rollback Strategy, Disaster Recovery, Azure DevOps Boards

WORK EXPERIENCE

Software Engineer (Cloud Infrastructure Engineer), Tech Mahindra

Jul 2025 – Present

Project: AT&T Bastion (Microsoft Azure, Amazon Web Services) | Noida, India

- Designed and managed secure Microsoft Azure infrastructure for enterprise workloads; administered Azure Bastion architecture for secure remote access across hybrid cloud environments.
- Managed Azure subscriptions, resource groups, virtual networks, IAM, and shared image galleries across Windows and Linux platforms; configured HTTP proxy solutions for traffic and security management.
- Troubleshooted Azure-to-on-premises connectivity issues spanning Azure Bastion, Load Balancers, Virtual Machines, and proxy configurations; used GitHub Copilot to accelerate code-related fixes.
- Monitored infrastructure and application health through metrics, logs, and operational health checks to maintain high availability and SLA compliance.

Software Engineer (Quality Analyst), Tech Mahindra

Aug 2024 – Jun 2025

Project: Tracfone–Verizon Vulnerability Remediation (Amazon Web Services) | Noida, India

- Performed SAST (Static Application Security Testing) and DAST (Dynamic Application Security Testing) scans across 126 applications to identify security vulnerabilities; tracked findings through remediation in alignment with compliance requirements.
- Conducted systematic vulnerability assessment and remediation of OS-level risks across AWS-hosted servers and applications.
- Performed OS patching aligned with Change Management protocols; executed pre-patching and post-patching validation using system checkpoints to ensure minimal downtime.
- Accessed AWS EC2 instances via AWS Session Manager for patching and upgrades; managed server snapshots and rollback strategy for risk mitigation and business continuity.

Software Engineer (Site Reliability Engineer), Tech Mahindra

Jul 2022 – Jul 2024

Project: Microsoft Nebula Score Cloud | Noida, India

- Served as Designated Response Individual (DRI) on an agile Site Reliability Engineering (SRE) team — owned service availability, service health, incident response, and SLA/SLO accountability.
- Monitored services using Dynatrace and Microsoft ICM; participated in daily spike-management calls, triaged alerts, and led/contributed to root cause analyses (RCA) for production incidents.
- Monitored and supported production applications using Hawkeye and Jarvis; improved alert detection time through proactive monitoring and alert tuning.
- Managed Cloudman billing, OS patching, OS upgrades, infrastructure monitoring, ticketing, and Fabric Manager operations; used KQL (Kusto Query Language) extensively to query telemetry and investigate production issues.
- Oversaw Microsoft Nebula architecture including offline nodes, storage tier services, hardware failures, host upgrades, reimaging, RAID configuration, WDS (Windows Deployment Services), fabric creation, and DHCP scoping.
- Coordinated with partner systems (SETO, Private Lab Networks, Microsoft Lab Services) for hardware and network operations.

Network Support Engineer, Tech Mahindra

Dec 2021 – May 2022

Project: Netgear (United States, United Kingdom, Australia, Canada) | Noida, India

- Resolved router, modem, and network connectivity issues for end customers via voice support; configured and installed wireless controllers, routers, and switches; performed routing/switching platform troubleshooting.

Technical Support Associate, Xavient Digital Software Solutions Pvt. Ltd.

Aug 2019 – Mar 2021

Project: TELUS Communications, Canada | Noida, India

- Provided technical support through root cause analysis, support documentation, and resolution; ensured compliance with company policies and data security standards.

Technical Support Executive, H13 Technologies Pvt. Ltd.

Jan 2018 – Jun 2019

Project: Hewlett Packard, India | Gurugram, India

- Troubleshoot Windows 8, 8.1, and 10 issues for end users via email and phone; supported a high-volume rollout queue to meet deadlines; conducted desktop and laptop troubleshooting.

Customer Service Representative, Convergys India Pvt. Ltd.

May 2016 – Oct 2017

Project: AT&T, Dallas, Texas, United States | Gurugram, India

- Delivered customer support across phone, email, and chat; resolved billing and service issues; strengthened client relationships and drove customer satisfaction.

EDUCATION

Master of Computer Applications (MCA), Manipal University Jaipur

2026 – 2028 (Pursuing)

Bachelor of Computer Applications (BCA), Manipal University Jaipur

2022 – 2025

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate | Amazon Web Services (AWS) | Issued May 2026
- AWS Certified Cloud Practitioner | Amazon Web Services (AWS) | Issued June 2025 (Valid through June 2028)
